

Our Founder and President

Paul Alba, founder and president of Specialized Engineering, has been in the medical disposables industry for over twenty years, pioneering glass balloon blowing under Jack Diettrich with Gary Miller and Gary Farlow. His work experiences at ACS, Mallinckrodt Medical, Baxter Medical, AVE and ocalmed/Perclose give him an unparalleled perspective that has catapulted Specialized Engineering to market leadership in the medical extrusion industry.

Why Choose Us

The Specialized Engineering staff is expertly trained.

The Specialized Engineering staff is expertly trained in assembly, extrusion, injection molding, machining, calibration and quality control. With deep experienced in the development and assembly of thermal plastic catheters.

ISO 9001:2000 Certification & Quality Policy

The Top Management of Specialized Engineering recognize that the disciplines of quality, health and safety and environmental management are an integral part of its management function. Central to the Company's development is the operation of an effective management system that meets all these requirements.

We promote a professional atmosphere of continuous improvement and always strive to do better. We know and believe that the Customer comes first, and support them through employee empowerment and continuous improvement. Our Quality Management System ensures consistency in all phases of our operation and in the quality of our products. Top Management continues to support and provide direction to exceed this goal.

The Organization's Quality policy calls for continuous improvement in its Quality Management activities and business is conducted according to the following principals:

- We Comply with all applicable State and Federal laws and regulations.
- We Follow a concept of continuous improvement and make best use of our management resources in all quality matters.
- We Communicate our Quality objectives and our performance against these objectives throughout the Organization and to interested parties.
- We Take due care to ensure that activities are safe for employees, associates, subcontractors and others who come into contact with our work.
- We Work closely with our Customers and vendors to establish the highest quality standards.
- We Adopt a forward-looking view on future business decisions that may have Quality impacts.
- We Train our staff in the needs and responsibilities of Quality management.

Specialized Engineering's Meditube Brand Precision Extruded Medical Tubing is manufactured to the highest standards of quality and closest tolerance in the industry. Our ISO 9001:2000 certification proves our dedication and adherence to quality process and manufacturing management. Specialized Engineering is the largest medical tubing manufacturer in Northern California.

Short Company Profile

Specialized Engineering began in Palo Alto, CA in 1996.

With one Harrel extruder and one employee and a reputation for high quality and quick turn around we quickly built up a tier-one client base.

In 2000, Specialized purchased another Harrel extruder and the company moved to its present location in Stockton, CA. With ISO 9001/2000 certification, Specialized has dedicated its mission to quality manufacturing and management processes.

For the quickest turn around in the Medical Extrusion Industry while meeting your precise quality expectations, Specialized Engineering delivers – from R&D short runs to manufacturing runs of over a million feet.

Specialized Engineering, LLC exclusively runs microprocessor controlled Harrel Geartruders. Check their website for more info at www.harrel.com
